## **Summary**

iOS app developer (including iPhone, iPad, iPod Touch) with five year experience in mobile application design and development. Used to develop both, mobile games and apps with complex business-logic. My goal is to create mobile software with high-performance and easily maintainable codebase on top of clean and useable UI. I am constantly learning new technologies and always try to improve my skills in this rapidly changing industry. I've also contributed in some open-source projects, and stay in touch with other interesting community projects.

## **Technical Skills**
